Retirement process flowchart

For members with Additional Voluntary Contributions (AVCs).

Key:

What your employer or line manager needs to do

What the AVC provider needs to do

1

Tell your employer you wish to claim your pension.

When:

Do this 3 months before you wish to retire.

2

Your line manager updates your leaving date in SOP.

When:

This happens as soon as the leaving date is agreed with your line manager.

Your employer will notify the Capita EA pensions team that you wish to retire.

When:

This will happen on the next weekly data sharing file (max turnaround 8 days).

4

Capita will request
1) pay data from your employer
2) AVC fund value from your provider.

Once received, your benefits are calculated and Option forms issued.

Pay data and AVC value requested within 1 day of receiving notification.

When:

Options form issued within 8 days of employer sending final pay data.

5

You then complete your Options Form and send it to Capita.

When:

Please complete this as soon as you can to avoid any delays.

6

Capita will set up a lump sum payment on account

(if you have standard lump sum entitlement).1

When:

Within 8 days of receiving your Options Form.

7

Your employer will send final pay data to Capita once your last salary payroll has been completed.²

Important - Please read reference note 2.

When:

This happens by the end of your last month in service. 8

Capita will request disinvestment of the AVC fund (only applicable if you've

bought AVCs).

When:

This happens within
1 month before your last
day of service.

9

The AVC provider will pay your disinvested AVC fund to Capita (only applicable if you've bought AVCs).

When:

The time this takes will depend on your AVC provider.

When:

Lump sum is paid as close as possible to the day after your last day of service. Monthly pension is paid at the end of the month following the month that you left service.

¹ The payment on account is 90% of the standard lump sum. If you're not entitled to a standard lump sum, then no lump sum payment on account is set up.

² Depending on what date in the month your retirement date is, Capita may have to wait longer for the final pay data, as your employer cannot provide this until your final payroll has been processed.

Important note: If you're late in sending your Options form back to us and you miss the payroll cut off point, any payments that are paid late would be backdated.
