Case Study

M-Kopa Solar – Generation Investment Management

This example is from one of our sustainable investments through Generation Investment Management.

M-Kopa Solar is a provider of pay-as-you-go solar power for off-grid households in Africa. Providing affordable access for low-income households to solar power instead of burning kerosene for lighting.

"I am happy to share a meal with my family. We get to catch up on our day's activities after dark, without worrying about the lights going off". Jackson Onyango, Kenya.
